## PROFILE

I am a front-end developer with 5 years of experience in building responsive, high-quality web applications using React and Material UI. I create clean, scalable, and modern interfaces using HTML5, CSS3, SCSS, JavaScript, Bootstrap 5, and jQuery, and I use Gulp to automate and optimize development workflows. I work confidently with Redux for state management and GitHub for version control, ensuring clean and maintainable code. I also collaborate closely with designers and efficiently translate Figma designs into functional, polished UI components. Additionally, I have experience working with WordPress for custom front-end development. With a strong focus on performance, usability, and consistency, I deliver smooth, intuitive, and user-centric web experiences.

## EXPERIENCE

### Frontend Developer

NO Brain IT Solutions Pvt. Ltd

August 2024 – Present

In this role, I developed scalable and high-performance web applications using React.js, Redux, and modern UI technologies such as JavaScript, jQuery, HTML5, CSS3, Bootstrap, and Material-UI. I optimized workflows with Gulp JS and Sass, implemented SEO-friendly and performance-driven coding practices, and ensured full cross-browser and mobile-first responsiveness. My work also included developing and maintaining WordPress websites using Elementor, integrating APIs to enhance interactivity, and delivering customized solutions based on direct client discussions. I actively contributed to Agile Scrum processes, participating in daily stand-ups and team ceremonies to support efficient collaboration and consistent project progress.

### Sr. Web Developer

Amura Marketing Technologies Pvt

March 2022–August 2024 (2.5 Year)

In this role, I developed high-performance and responsive web applications using JavaScript, jQuery, HTML5, CSS3, Bootstrap, React.js, and Redux while optimizing workflows through Gulp JS and Sass. I implemented SEO-friendly coding standards, ensured full cross-browser and mobile responsiveness, and integrated APIs to deliver seamless data flow and enhanced user experiences. My work involved collaborating directly with clients to understand requirements, aligning frontend development with backend systems, and maintaining clean, scalable code architecture. I actively participated in Agile SCRUM processes—including daily stand-ups, sprint reviews, and retrospectives—to consistently deliver reliable, efficient, and user-focused frontend solutions.

### Frontend Developer

X-Byte Enterprise Solutions

March 2020–March 2022 (2.1 Year)

In this role, I developed responsive and scalable web interfaces using ES6, JavaScript, Bootstrap, HTML5, CSS3, Sass, and jQuery while ensuring seamless cross-browser and mobile compatibility. I implemented modern UI features such as light/dark mode, optimized frontend performance through faster load times and efficient rendering, and created visual assets including logos, banners, and social media creatives. I collaborated closely with backend teams for smooth feature integration, conducted code reviews to support junior developers, and resolved UI/UX issues to maintain design consistency and high-quality user experiences across all platforms.

# JOB DESCRIPTION

NO Brain IT Solutions Pvt. Ltd

## Nafis, M12

- Developed responsive and modern dashboards for the M12 project using React.js and Material-UI, ensuring a clean layout, smooth navigation, and mobile-friendly user experience.
- Applied Agile methodology, actively participating in stand-ups, sprint planning, and reviews to deliver dashboard modules efficiently and on time.
- Built scalable and interactive UI components for the NAFIS project using React.js, Redux, Material-UI, and Bootstrap, ensuring consistency and high performance.
- Implemented multi-language support in the NAFIS application, enabling seamless language switching and improving accessibility for a global user base.
- Managed and structured the front-end using React best practices, ensuring clean code architecture, reusability, and easy maintenance.
- Focused on delivering intuitive, user-friendly interfaces that aligned with client requirements and enhanced overall product usability.

Amura Marketing Technologies

## Kylas Sales CRM

- Developed a fully custom React-based plugin for Kylas Sales CRM, enhancing its functionality and user workflow.
- Implemented automated PDF generation to enable seamless creation of professional payment slips directly within the CRM.
- Improved overall user experience by delivering an intuitive, efficient, and easy-to-use payment slip generation feature.
- Demonstrated strong expertise in React.js through successful integration and smooth plugin performance within the CRM ecosystem.
- Extended and customized core CRM capabilities to align with specific business requirements and operational needs.
- Delivered a practical, high-impact tool designed to optimize business processes and support real-world CRM use cases.

## Sany, NPAV, HROne, Uneecops, Land Global, Natural Remedies Human Health

- Developed responsive, user-friendly, and visually appealing front-end interfaces using JavaScript, HTML5, Sass, Gulp JS, and GitHub.
- Implemented modern UI themes for NPAV, including both light and dark modes, ensuring a clean, intuitive, and accessible user experience.
- Built performance-optimized layouts with seamless cross-browser compatibility and mobile responsiveness.
- Collaborated closely with cross-functional teams in an Agile SCRUM environment, participating in daily stand-ups, sprint planning, reviews, and retrospectives.
- Translated client requirements into functional UI components, maintaining a strong focus on usability and design precision.
- Ensured high-quality code standards by applying best practices and maintaining a structured, scalable frontend architecture.
- Delivered project modules on time while consistently meeting or exceeding client expectations for UI quality and performance.

X-Byte Enterprise Solutions

## AutoCrit

- Executed multiple projects using the Agile SCRUM methodology, actively participating in daily stand-ups, sprint planning, sprint showcases, and retrospectives to ensure smooth delivery.
- Developed a Single Page Application (SPA) with efficient data binding and real-time synchronization using Sass, Bootstrap, and modern frontend tools.
- Utilized JavaScript and jQuery for dynamic client-side scripting to enhance interactivity and user engagement.
- Created responsive and mobile-friendly web designs using CSS3 and Bootstrap, ensuring consistent layouts across various departments and pages.
- Built clean and modern UI components using HTML5, CSS3, JavaScript, and other frontend technologies.
- Designed cross-browser compatible web pages to ensure seamless user experience across all major browsers.
- Performed client-side form validation using JavaScript and implemented API integrations to enable smooth data flow within the application.
