Dear Hiring Manager,

I am writing to apply for the React.js Frontend Developer position and to express my strong interest in contributing to your team. With 5+ years of experience in frontend development, I have strong expertise in React.js and specialize in building scalable, component-driven, and high-performance web applications.

My core strength lies in developing applications using React.js, Hooks, Context API, Redux, TypeScript, and modern JavaScript (ES6+). I have hands-on experience in creating reusable components, managing application state, integrating REST APIs, and optimizing performance for real-world production applications. I also work extensively with Material-UI and Tailwind CSS to deliver clean, consistent, and maintainable UI systems.

I have strong experience converting Figma designs into pixel-perfect React interfaces, implementing dark/light mode, and building fully responsive applications that work seamlessly across all devices using modern CSS practices (Flexbox, Grid, rem, vh, vw).

My project experience includes enterprise-level React applications such as SANY, NPAV, NAFIS, M12, Land Global, and Natural Remedies Human Health, where I focused on UI scalability, multilingual support, performance optimization, and cross-browser compatibility. I have also contributed to CRM-based React applications using modular architecture and reusable UI patterns.

I work effectively in Agile/Scrum environments, collaborating closely with designers and backend teams, participating in sprint ceremonies, and following best practices for clean code, accessibility, SEO, and Git-based version control.

I am confident that my React.js expertise, hands-on project experience, and strong UI focus make me a strong fit for this role. I would welcome the opportunity to discuss how I can contribute to your team's success.

Thank you for your time and consideration.

Sincerely,
 Vrushank Modi
